

THE OLYMPION DIALYSIS CENTER OF AMALIADA

The **OLYMPION Dialysis Center of Amaliada**, on the Peninsula of Peloponnese, is set in a renovated building, on the main road of the city of Amaliada.

It is a modern renal facility that can easily be reached from all the hotels located along the beautiful beaches of the surrounding area and offers free parking space.

The highly equipped Center welcomes local and International patients for dialysis treatments since 2017.

All the **OLYMPION Dialysis Centers** combine high-end technology, provided by GAMBRO Company, specialized in high-end technical support for the renal treatment, and experienced personnel. The Dialysis treatment options offered include hemodialysis and on-line hemodiafiltration.

The medical teams are supervised by the Medical Director of each Center and make sure that the provided treatment is carried out according to the highest medical standards.

The Medical and the Administrative staff that coordinate your dialysis before and during your stay, will be pleased to assist you before your arrival and welcome you at the Center. The friendly teams of the OLYMPION Dialysis Centers, are multilingual and take good care of the holiday patients' safety and comfort during their treatment.

Highlights:

- Water treatment with double reverse osmosis.
